Ambassador's Lecture Series

Prof. Dr. Bart De Moor, Vicerector Internationaal Beleid,
heeft het genoegen u uit te nodigen voor de derde lezing
in het kader van de K.U.Leuven Ambassador's Lecture Series

**“Investing in Science, Research & Innovation : the view from Germany ”
Prof. Dr. Reinhard Bettzuege, Ambassadeur van Duitsland in België**

German research institutions show an annual budget of almost 10 billion euro. These numbers are bound to increase further as Germany has identified "innovation and science" as its key feature in the world of tomorrow. A clear choice for investment in research and development, innovation and science in difficult times has had an unmistakable impact on economic recovery. Rising rates of entrepreneurship and increased creativity hold the promise of a global and sustainable growth for the German (and Flemish ?) economy

In zijn inleiding legt Prof. Dr. P. Marynen, als Vicerector Onderzoeksbeleid van de K.U.Leuven, de link met de actuele Vlaamse situatie en werpt hij vanuit de voorgehouden spiegel een blik op de toekomst van universitair onderzoek en ontwikkeling in Vlaanderen

Open vraag- en antwoordsessie ter afsluiting

Donderdag 24 februari 2011 om 10 uur in Auditorium R. Snoeys,
Celestijnenlaan 300 te Heverlee. Einde omstreeks 11u15.

Gelieve voor 21 februari uw aanwezigheid te bevestigen via [inschrijving](#).

De lezing is in het Engels

Ambassador's Lecture Series

The Vice Rector for International Policy, Prof. Dr. Bart De Moor,
cordially invites you to the third lecture
in the K.U.Leuven Ambassador's Lecture Series

**“Investing in Science, Research & Innovation : the view from Germany”
His Excellency Prof. Dr. Reinhard Bettzuege, Ambassador of Germany to Belgium**

German research institutions show an annual budget of almost 10 billion euro. These numbers are bound to increase further as Germany has identified "innovation and science" as its key feature in the world of tomorrow. A clear choice for investment in research and development, innovation and science in difficult times has had an unmistakable impact on economic recovery. Rising rates of entrepreneurship and increased creativity hold the promise of a global and sustainable growth for the German (and Flemish ?) economy

In his introduction, Prof. Dr. Peter Marynen, Vice Rector for Research Policy at K.U.Leuven, will comment on the current Flemish situation and will look to what the future of university research and development holds in Flanders

Open question and answer session to follow

Thursday, February 24, from 10 a.m. till 11.15 a.m.
Auditorium R. Snoeys, Arenberg Campus
Celestijnenlaan 300 in Heverlee.

Please [register](#) by February 21.

This lecture will be in English
