

## VARIABLE TRANSFORMERS

With the support of

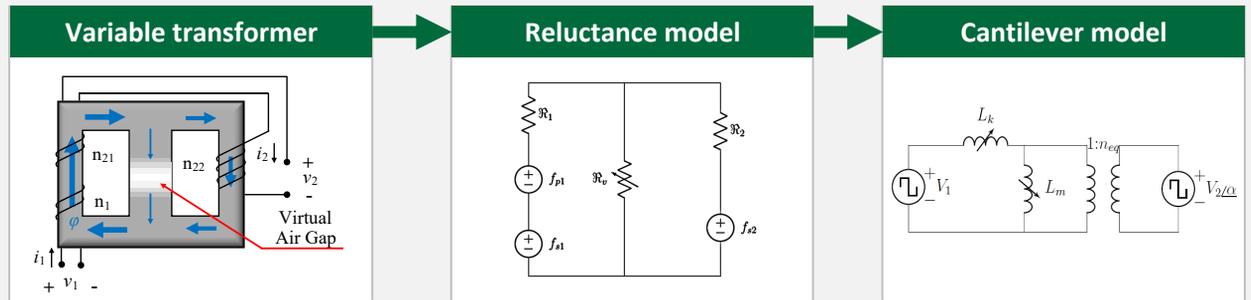

### Variable Transformer for DAB Converters

- Low efficiency at low load conditions
- Low efficiency at unmatched voltages
- Variable transformer voltage gain

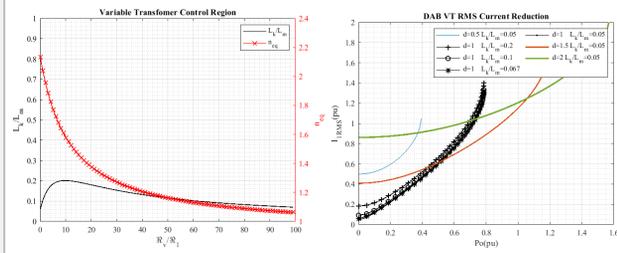

### Controllable Magnetics Model

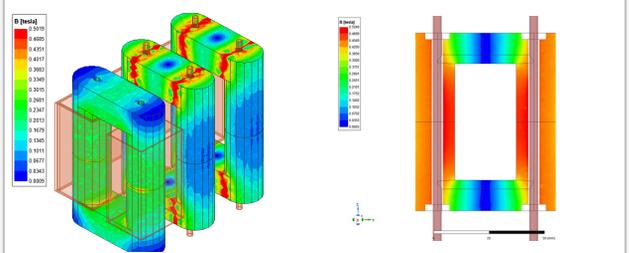

### Simulations

#### Cantilever model simulations

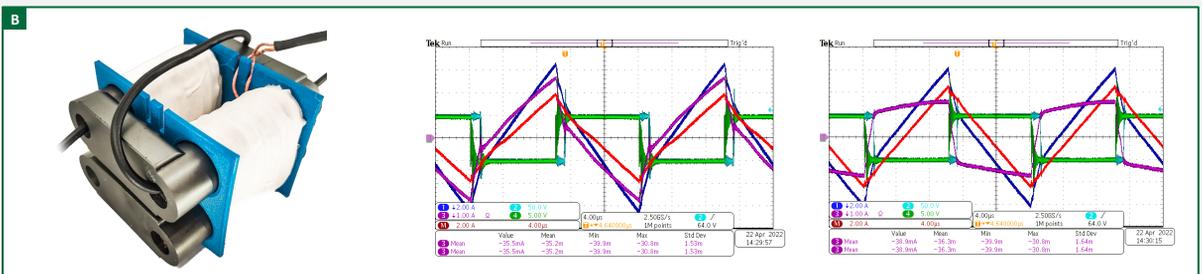

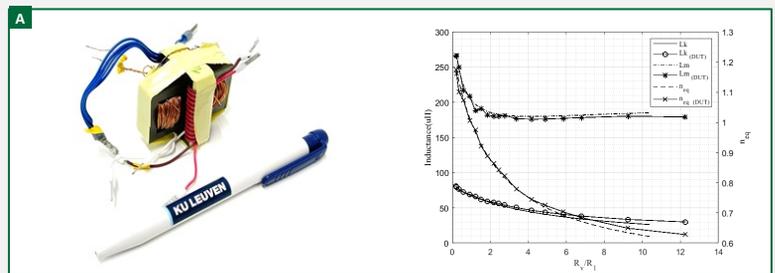

#### FEM simulations

### Experimental Validations

- A** Small signal validation
- B** Large signal validation

## CONTACT

KU Leuven - EnergyVille counts on the collaboration with industrial partners who seek research support in the field of power electronics. Within EnergyVille, KU Leuven collaborates with VITO (BMS, Battery, Heat Sinks,...), imec (Semiconductors, PV) and Hasselt University (Reliability, PV).
